

# SENTRY I-A100/200, I-ASC100/200 Series AC Current Transducers with 0-5/10VDC or 4-20mA Output

The Sentry I-A100/200, I-ASC100/200 Series AC Current Transducers provide a voltage or current signal proportional to monitored current up to 200A. Available in both solid core and split core configurations.

## FEATURES

**Variable  
Frequency  
Integration  
for VFDs**

### New VFI Technology for VFDs

New Variable Frequency Integration technology uses high speed sampling to provide accurate measurements of current on the load side of VFDs.

### Reliability

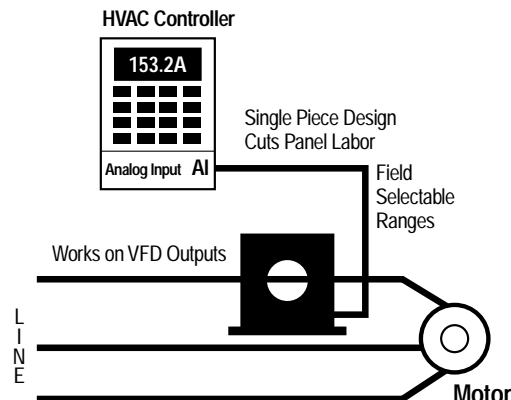

Field-proven in hundreds of thousands of installations since 1982. Solid performance even in rooftop environments. Backed by five-year warranty.

### Convenience

Compact size, integral mounting flange, and two-wire hookup assure an installation that is simple, fast, and secure. You save money and avoid callbacks. The split core version simplifies retrofits.

## APPLICATIONS

- **Automation Systems:** Analog current reading for remote monitoring and software alarms
- **Fan/Pump Status:** Electronic proof of flow
- **Sense High Current:** Accurately read the secondary current from high ratio CTs
