

Product Data

I-LC

I-PS

Plexi Shield

I-WS

Weather Station

Product Description

INTEC has some options when your application calls for additional security or protection.

The I-LC can be used to protect any INTEC Controls Room mounted enclosure from physical damage or tampering. It comes with a clear vented cover and two keys.

The I-PS is a clear lucite shield that is designed to cover a wall thermostat or temperature sensor. Not only will it protect the thermostat or sensor, but it can also be used to stabilize the temperature in rooms where large fans or extreme environmental changes are present.

The I-WS is designed to provide protection in both indoor and outdoor environments. It will provide protection from rain, sleet, snow, or against dripping water. It is made of 16 gauge G-90 galvanized steel and is coated with white enamel.
